Adventures at the Farm - Baby

Kids Alive and Messy Bubs have joined forces to share water safety messages through unique sensory play experiences. There are many amazing benefits to multi-sensory play that lead to development of thought, intelligence and social skills. It is a wonderful way to create quality creative time for families and caregivers.

By combining this form of play with water safety messages we are creating a unique way to educate children under 5. Use the lesson plans to guide the activity and help expand the learning of little ones under your care. Everything can be adapted to suit your environment and resources available.

YOU WILL NEED:

- ✓ 1 x 500g Cornflour
- ✓ 2 Tbs of Cocoa Powder
- ✓ 6 x Weet-bix Blocks
- ✓ 2 Cups of Water
- ✓ Bowl and Pigs
- ✓ Kids Alive Do The Five Music   

METHOD:

- ❖ Add cornflour to your bowl.
- ❖ Add cocoa powder to the bowl and mix together.
- ❖ Slowly add water, mixing the ingredients all the time.
- ❖ The mud bath should be ready when it is a slimy consistency.
- ❖ Pour the slime on your tray or container and add the Weet-bix for hay bales.

LEARNING OUTCOMES:

- ❖ Oobleck is made up of cornflour and water so it is extremely safe for babies to play with as all the above ingredients are edible and babies will enjoy mouthing the mixture.
- ❖ Oobleck has a science concept where it is a 'non newtonian' substance meaning its not really a solid or a liquid.
- ❖ Oobleck is also great for the development of fine motor skills as babies and young children work and strengthen their little hand muscles while engaged in sensory play.

**Adult supervision required at all times.
Never leave a child alone with the items.**

Water Safety Messages

Create a safe play area for children on farms

Beware of dams, water troughs & tanks

Lakes, ponds, rivers and creeks are hazardous

Active adult supervision is vital

Learn CPR

Adventures at the Farm - Muddy Pigs

What can you smell?

Oobleck is made up of cornflour and water so it is extremely safe for babies to play with as all the ingredients are edible and babies will enjoy mouthing the mixture. Oobleck has a science concept where it is a 'non newtonian' substance meaning its not really a solid or a liquid.

LEARNING OUTCOMES:

- ❖ Oobleck is great for the development of fine motor skills as babies and young children work and strengthen their little hand muscles while engaged in sensory messy play.
- ❖ Adding cocoa powder to the mixture adds an extra sensory input by giving the mixture a wonderful smell.
